S2 PERSONAL

THE MOST VERSATILE AND
RUGGED THERMAL IMAGER
AVAILABLE TODAY

S2

The **S2 PERSONAL** has been designed to equip each fire-fighter with thermal imaging technology and in doing so reducing price barriers, offering the opportunity to bring thermal imaging to more fire-fighters. Using the **SOLO 5200Ti camera core** means less restriction and greater control as SOLO manufactures every single part of each S2 PERSONAL.

The **S2 PERSONAL** is the Worlds smallest, lightest hand held camera yet still manages to utilise a 3.5 inch OLED display. The OLED feature of the display offers sharper, brighter image definition than a standard LCD display as found in many hand held imagers. Weighing only **1.2lbs** and offering 51° field of view the **S2 PERSONAL** offers more functionality all in a easier form than ever before.

The **S2 PERSONAL** utilises a fire retardant glass filled material and includes power pack and locking configuration along with the same **SOLO 5200Ti** camera core platform as used in the entire SOLO camera range.

Further protection is offered by the oversized nomex side handles and vulcanised rubber screen shroud.

The **S2 PERSONAL** has been designed as an ultra small form camera and yet still be small enough to easily clip to fire-fighters' gear. Side hand carry straps and retractable lanyard complete the rugged external changes over the S2 INTEGRATED model.

The spec level is factory fixed with spot temperature, battery gauge, single colour map and zoom all as standard features.

The higher end specs can include up to four colour maps, colour invert, ambient temp, video capture and picture capture on top of all the standard features.

The power supply for the S2 PERSONAL comes straight from the tried and tested S2 INTEGRATED battery power pack and will be offered with up to four batteries for over EIGHT hours continuous operation.

The S2 PERSONAL will be offered with the standard SOLO : LIFE TIME MANUFACTURER WARRANTY with a standard two year electronic components warranty.

S2 PERSONAL Features:

- Ultra small form design.
- ONLY 1.2 lbs overall weight.
- 3.5 inch OLED display.
