Emergency Pneumatics.

Equipped for emergencies.

Vetter has been the leading supplier of emergency pneumatics for decades – and still is. We offer you a product range for demanding professionals, developed especially for rescue operations. As a result, Vetter products guarantee you maximum functionality, even in extreme conditions. Count on it!

Experienced in rescue

About 50 years of international cooperation with fire brigades make Vetter a partner you can rely on. We apply our experience and expertise to the constant refinement of our products. Your benefit: Sophisticated emergency pneumatics help you to get everything under control. So, you can fully concentrate on your work.

Technology leader

Highly specialised pneumatics is our core business. Benefit from our complete range of emergency pneumatic products – developed by our engineers in Germany. At Vetter, we are committed to a wide variety of pressure levels, materials and designs, and we always set the bar somewhat higher: Our 12-bar lifting bags already represent the next generation in rescue technology.

Expert advice worldwide

Vetter listens to you. Together with you, we will choose equipment exactly tailored to your rescue scenarios. Our worldwide dealer network is always at your service: before, during and after your purchase.

Highest quality – made in Germany

Put your trust in first-class rescue technology handmade by Vetter. Flawless materials and meticulous handwork are the foundation for the safest emergency pneumatics on the market. So nothing can go wrong when it really counts. Our product range is produced almost entirely in Germany and every product is individually checked before delivery, as you can confirm by checking our test seal.

Lifting bags

Simply indispensable for rescuers worldwide.

S.Tec 12 Lifting Bags (12 bar / 174 psi)

The next generation of high-pressure lifting bags.

- › 50 % more performance*
- › up to 102 tons (112 US tons) lifting power
- › 2.5 cm (0.98 inch) insertion height
- › max. lifting power and height are readable at the side

Vetter has further optimised the popular mini lifting bags to create a new generation of lifting bags: Vetter S.Tec 12 Lifting Bags master every rescue operation with ease. Amazingly flat and uniquely powerful. Its dynamic 12-bar lifting power makes it the most impressive lifting bag on the market. With an insertion height of only 2.5 cm (0.98 inch), our S.Tec 12 Lifting Bag fits in even the narrowest gaps and openings. Thanks to its intelligent surface profile, you can safely stack two bags.

NEW

50 % performance increase with the same bag size.

Is valid for the following S.Tec 12 Lifting Bags V 1, V 5, V 7, V 33L, V 35, V 59, V 83 and V 102

Same lifting power with smaller and lighter bags*

Is valid for the following S.Tec 12 Lifting Bags V 10, V 12, V 20 and V 50

Uniform low insertion height of 2.5 cm (0.98 inch) for all bag sizes.

Lifting power up to 102 tons (112 US tons).

In operation ...

- › Freeing trapped persons
- › Traffic accidents
- › Rockfalls or landslides
- › Collapsed buildings

Good reasons:

- › 50 % performance increase*
- › Stackable due to non-slip surface profile
- › Safety coupling
- › Aramid-reinforced
- › compatible with 8 + 10 bar inflation accessories

Guaranteed quality:

- › Individually tested (with dated inspection seal)
- › Safety factor greater than 4:1
- › Complies with EN 13731 (independently tested)
- › 3-year guarantee

S.Tec Lifting Bags sets (12 bar / 174 psi)

The world's most popular sets for any application:

Rescue set (12 bar / 174 psi) – 426 kN

S.Tec 12 Lifting Bags up to 20 tons (22 US tons) 1316001500

This set is especially versatile and suitable for almost all road applications. Whether lifting vehicles when people are trapped underneath or freeing trapped limbs after traffic accidents, this set is a reliable helper.

The set includes:

- › Lifting bags V 10, V 12, V 20
- › 2 inflation hoses 12 bar, 5 m, yellow and red (174 psi, 16.4 ft.)
- › Air CU lighting, deadman controller
- › Pressure regulator 200 / 300 bar (2,900 / 4,350 psi)

Emergency Rescue set (12 bar / 174 psi) – 961 kN

S.Tec 12 Lifting Bags up to 33 tons (36 US tons) 1316001600

The emergency rescue set is ideal for the rapid rescue of trapped persons. The multitude of lifting bags lets you react to the lifting weight with great versatility. Use the emergency rescue set to create free space during traffic accidents and natural catastrophes.

The set includes:

- › Lifting bags V 10, V 12, 2 x V 20, V 33L
- › 2 inflation hoses 12 bar, 5 m, yellow and red (174 psi, 16.4 ft.)
- › Air CU lighting, deadman controller
- › Pressure regulator 200/300 bar (2,900 / 4,350 psi)

Heavy rescue set (12 bar / 174 psi) – 2,403 kN

S.Tec 12 Lifting Bags up to 59 tons (65 US tons) 1316001700

With the heavy rescue set, you have 9 bags in 7 different sizes at your disposal, from little helpers to the big bag with up to 59 tons (65 US tons) of lifting power. With this set, you are ready for everything: traffic accidents with heavy trucks, collapsed buildings and even natural disasters. The heavy rescue set should be available at every major rescue operation.

The set includes:

- › Lifting bags V 10, V 12, 2 x V 20, V 33L, V 35, 2 x V 50, V 59
- › 2 inflation hoses 12 bar, 5 m, yellow and red (174 psi, 16.4 ft.)
- › Air CU lighting, deadman controller
- › Pressure regulator 200 / 300 bar (2,900 / 4,350 psi)

S.Tec Lifting Bags (12 bar / 174 psi)

Technical data*

You want a set of lifting bags perfectly tailored to your requirements? Just ask us. We'll be pleased to advise you.

Your choice:

- › 12 different lifting bag sizes (square or rectangular shaped) with lifting power up to 102 tons (112 US tons)
- › 4 controllers (3 deadman versions, 1 fitting)
- › many different compressed air sources including compressed air cylinder, compressor, compressed air connection on vehicles

For the right accessories to assemble custom sets, see page 30.

S.Tec 12 Lifting Bags (12 bar / 174 psi):
Working pressure: 12 bar (174 psi)
Test pressure: 18 bar (261 psi)
Burst pressure, at least: 48 bar (696 psi)

L = rectangular shaped lifting bag

Standard insertion height of only 2.5 cm (0.98 inch).

*Technical changes reserved.
** Actual lifting power after subtraction of the edge area.

Your choice of S.Tec 12 Lifting Bags depends on the weight to be lifted as well as the necessary lifting height. We'll be pleased to advise you.

Connectable Bags C.Tec (10 bar)

Singly or combined - always a powerful team

- › High level of stability with lift heights up to 2.1 m (82 inches)
- › Tool-free connection technology
- › Up to three bags can be used on top of each other
- › Constant final lifting power

Vetter Connectable Bags C.Tec are the perfect solution for enabling critical situations to be dealt with rapidly. They combine the lifting power of the Mini lifting bag and the height of lift of the known Vetter 1 bar lifting bag. As a result, the possibility exists to be able to react at all times to variable heights up to 2.10 meters. Thanks to the tool-free connection technology, the bags are ready for action in a few seconds. The load plate integrated into the bag guarantees a high level of stability and load-bearing capacity during the lifting procedure. The lifting of point loads and objects with sharp or pointed surfaces is possible without additional adapters.

Integrated load plate

Connection plate

In operations by ...

- › Rescuing trapped persons
- › Creating accesses
- › Natural catastrophes, building collapses and accidents

Good reasons:

- › Highest lifting height and lifting capacity in the connectable bag segment in the market
- › Simple handling
- › Tool-free bag connection
- › Bags can be used individually or combined
- › No emptying necessary to dismantle

Guaranteed quality:

- › Individually tested (with dated inspection seal)
- › Safety factor more than 4:1
- › EN Complies with EN 13731 (independently tested)
- › 2-year guarantee

Connectable Bags C.Tec (10 bar)

Are you looking for a lifting-bag set which is perfectly coordinated to your requirements? Contact us. We will be glad to advise you!

You have the following selection:

- > 3 different lifting-bag sizes with up to 143 tons lifting power
- > 4 control devices (3 deadman versions, 1 fitting)
- > Many different compressed air sources, e.g. compressed air bottle, compressor, compressed air connection to the vehicle

You can find the right accessories for combining the individual sets from page 30.

Ultra flat bags S.Tec (10 bar / 145 psi)

The unbeatably flat first-aider of the S.Tec series.

- › 25 % more performance*
- › Ready to use in seconds
- › Insertion height only 1.6 cm (0.6 inch)
- › reflective markings

The perfect complement to your C.Tec lifting bags. With their super-flat insertion height of only 1.6 cm (0.6 inch), Vetter ultra flat bags are the ideal first-aider at the rescue site, fitting into the smallest of gaps. They exert their strength in the most confined spaces and make room for other rescue tools. Thanks to their low air requirement and extreme ease of use, Vetter ultra flat bags are ready to use in seconds. In short: an indispensable tool in a wide range of situations.

Reflective markings

These flexible first-aiders are the perfect complement to your C.Tec lifting bags.

In operation...

- › Freeing trapped persons
- › Preliminary measures
- › Freeing trapped limbs
- › Enlarging smallest openings
- › At accidents

Good reasons:

- › Super-flat insertion height of only 1.6 cm (0.6 inch)*
- › Flexible and easy to use
- › Aramid-reinforced

Guaranteed quality:

- › Individually tested (with inspection seal)
- › Safety factor greater than 4:1
- › Complies with EN 13731
- › 3-year guarantee (independently tested)

Super-flat insertion height of only 1.6 cm (0.6 inch).

Mini lifting bags (8 bar / 116 psi)

The proven standard worldwide.

- › Versatile applicable
- › Safety coupling
- › Insertion heights as low as 2.5 cm (0.98 inch)
- › Quality – made in Germany

Thanks to their low insertion height, our mini lifting bags enable you to free injured persons quickly and smoothly. Lift even heaviest loads in a single smooth movement! Vetter's mini lifting bags demonstrate their versatility on the job: use them to lift, push, press, prise or split as the situation demands – safely and reliably even on difficult inclines. The optimised surface profile on Vetter's mini lifting bags masters even slippery surfaces such as sand or grass without any problems. The special safety coupling prevents unwanted disengagement of the hose from the lifting bag.

Stackable up to 2 bags.

Especially flat with insertion height from 2.5 cm (0.98 inch).

Sturdy, non-slip surface.

Especially strong: Several layers of aramid make our mini lifting bags very sturdy and long-lasting.

In operation ...

- › Freeing trapped persons
- › Traffic accidents
- › Rockfalls or landslides
- › Collapsed buildings

Good reasons:

- › Insertion height from 2.5 cm (0.98 inch)
- › Non-slip surface

Vetter emergency pneumatic in action

Wedge lifting bags (1 bar / 14.5 psi)

Smooth and precise at bus accidents.

- › Uniform pressure distribution
- › Safe operation
- › For thin-walled coachwork
- › Wedge-shaped for optimum lift angle

At bus accidents, your emergency personnel must cope with many injured persons at once, and seconds make the difference between life and death. The special shape of Vetter's wedge lifting bags provides an optimum lift angle. Free trapped passengers quickly from overturned busses. Thanks to the wedge-shaped bags, the load is distributed uniformly over the entire lifting distance. With their ideal pressure distribution, the bags are perfectly suited to lift thin-walled coachwork such as the side walls of buses. In doing so, they maintain continuous and secure contact with both the coachwork and the underlying surface.

Positioning ropes on the back side.

Wedge lifting bag set up to 12 tons (13.2 US tons)	3110012400	3110012500 (USA)
2 wedge lifting bags 1 bar (14.5 psi), 6 t (6.6 US tons)	2 filling hoses 1 bar, 10 m, yellow and red (14.5 psi, 16.4 ft.)	
Air CU lighting 1 bar (14,5 psi), deadman controller	Pressure regulator 200/300 bar (2,900/4,350 psi)	
Packing bag 110 x 72 x 30 cm (43 x 28 x 12 inch)	Repair material	

Technical data*

Wedge lifting bags (1 bar / 14.5 psi)	Lifting power to / US tons	Lifting height, max. cm / inch	Size cm / inch	Air requirement litres / cu. ft.	Weight, approx. kg / lbs
3110007702	6.0 6.6	60 23.4	80x80 31.2x31.2	506 17.9	10.4 22.9

Wedge lifting bags (1 bar / 14.5 psi):

Working pressure: 1 bar (14.5 psi)
Test pressure: 1.5 bar (21.8 psi)

Insertion height of 3 – 6 cm (1.2 – 2.3 inch) due to the wedge profile.

Ideal lift angle due to wedge profile.

Accessories for lifting bags (1 bar / 14.5 psi) can also be used with wedge lifting bags, so you can avoid costly multiple purchases.

- In operation ...**
- › Rescuing trapped persons

Lifting bags (1 bar / 14.5 psi)

Versatile classic with great lifting height.

- › High stability
- › Minimal pressure point loading
- › Lifting height up to 1.10 m (43 inch)
- › Insertion height only 3 cm (1.2 inch)

Our classic lifting bag has proven itself in 40 years of service. Trust in handwork made in Germany and rely on the pneumatics professionals. Internal stabilising straps keep the lifting bag from bulging and provide a flat contact area over the entire lifting height. Vetter lifting bags are distinguished by an ideal pressure distribution. In effect, they can also lift thin-walled coachwork such as lorries, vans or small airplanes without damaging them. On soft or slippery surfaces, the clever anti-slip dimples on the extremely tough top and bottom sides provide a firm hold.

Efficient lifting of overturned vehicles.

Stabilising straps for a flat contact area.

Gentle lifting of sensitive structures.

All Vetter lifting bags (1 bar / 14.5 psi) have an insertion height of only 3 cm (1.2 inch).

In operation ...

- › Freeing trapped persons
- › Traffic accidents
- › Uprighting vehicles with thin-walled coachwork

Good reasons:

- › Low pressure point loading
- › Constant lifting power over the entire lifting height
- › Working pressure adjustable from 0.1 to 1 bar (1.45 to 14.5 psi)
- › Side walls of high-quality aramid

Guaranteed quality:

- › Individually tested (with inspection seal)
- › Safety factor at least 3:1
- › Complies with EN 13731 (independently tested)
- › 2-year guarantee

Lifting bag sets (1 bar / 14.5 psi)

Technical data***

Vetter lifting bags are available with deadman or fitting control.

The deadman control returns to the zero position automatically, preventing uncontrolled inflation of the lifting bag. The fitting control is operated with a ball valve. Careful: The air supply does not stop automatically.

All of the sets described here include the following standard components:

- 2 inflation hoses 1 bar, 5 m, yellow and red (14.5 psi, 16.4 ft.)
- Air CU lighting, deadman controller
- Packing bag
- Pressure regulator 200/300 bar (2,900/4,350 psi)
- Repair material

Set with deadman controller

Adapter for stationary compressed air network	
	1600008200

Pre-pressure regulator, maximum inlet pressure 16 bar (232 psi)**

	1600014500
---	------------

Inflation with Vetter hand and foot pump, no further adapters or hoses needed.

	Hand pump, 520 cc / stroke	1600008700
	Foot pump, 420 cc / stroke	1600009400

Adapter set for all compressed air sources **1600012501**

	Air-supply hose, 10 m (32 ft.), green	1600013401
	Air-supply hose, 10 m (32 ft.), green with shut-off valve	1600013601
	Adapter for truck tyre inflation system	1600007800
	Truck tyre valve	1600008000
	Truck tyre valve connector	1600012900
	Truck compressed air connector	1600007500
	Sealing-off cap	1600012600
	Adapter for construction-site compressor	1600012000
	Adapter for stationary compressed air network	1600008200
	Bag 18 x 45 cm (7 x 17.7 inch)	1520002500

* For every air source other than the compressed air cylinder, you need one of the two green air-supply hoses.

** Note: If the outlet pressure of the compressed air network exceeds the allowed inflation pressure of the controller, then the adapter must be replaced with the pre-pressure regulator.

Safety cushions

The last resort in great challenges.

Safety cushions SP 16 / SP 25

Fast rescue from heights up to 25 metres (80 ft.).

- › Rescue from up to 8 floors
- › Easy to carry, even when set up
- › Fast setup
- › Psychologically optimised

Vetter safety cushions* provide fast help when space is restricted at the rescue site or when facades are inaccessible to aerial ladder trucks. That way, you are ideally equipped even for difficult operational situations. Quickly set up and easily transported, the Vetter SP 16 and SP 25 safety cushions make it easier to gain access to the rear sides or courtyards of buildings. Our safety cushions also offer a safe solution for the rescue of trapped rescue personnel. Since 2014 the SP 16 is the only standardized safety cushion in Germany. So protect yourselves and all affected people in case of rescue from extremely heights and trust our jump cushions.

Neon-yellow side walls improve the visibility of our safety cushions at night or in bad weather. The landing areas are psychologically optimised: the blue circle – developed with experienced psychologist Prof. Horst Schuh – has been shown to reduce the crippling fear experienced by the jumper.

Our safety cushions have been tested by an independent institution in accordance with or based on the DIN 14151 T 1 and T 3. This standard requires elaborate testing including many drop tests with different falling weights and drop positions. To measure impact deceleration, a kind of crash test with dummies is especially important. After all, it is most essential to prevent jumping persons from hitting too hard, breaking through to the ground, or even bouncing back from out of the cushion.

In short: Only with a certified safety cushion, you protect a jumping person and your rescue team optimally from avoidable injuries.

Available in 2 sizes: SP 25 for jump heights up to 25 m / 80 ft. (8 floors) and SP 16 for jump heights up to 16 m / 51.2 ft. (5 floors).

Easily positioned by 2 persons.

Psychologically optimised surface reduces fear.

The SP 16 can be set up in 30 seconds.

We will be happy to provide you with the test certificates according to DIN 14151 T3: +49 (0)2252 / 3008-0 or vetter.info@idexcorp.com.

In operation ...

- › Fires in buildings with up to 8 floors / 25 m (80 ft.) (SP 25)
- › Safeguarding for high-angle rescue
- › Areas inaccessible to aerial ladder trucks

Good reasons:

- › Only 2 or 4 persons needed for setup
- › Outer cover of flame-resistant, tear-proof material
- › SP 16 approved according to DIN 14151 T1 and T3
- › SP 25 tested based on DIN 14151 T1 and T3

Guaranteed quality:

- › Individually tested with falling weights
- › Dated inspection seal
- › Integrated safety valve
- › 2-year guarantee independently tested

Safety cushion sets SP 16 / 25

Technical data*

Blue circle

Safety cushion set SP 16 (rescue high up to 16 metres / 51.2 ft.) **1530018100**

Safety cushion set SP 25 (rescue high up to 25 metres / 80 ft.) **1530018600**

The psychologically optimised landing area with the blue circle design was developed in cooperation with experienced psychologists. The neon-yellow side walls enhance the visibility of the safety cushion at night and in bad weather.

Black cross

Safety cushion set SP 16 (rescue high up to 16 metres / 51.2 ft.) **1530015500**

Safety cushion set SP 25 (rescue high up to 25 metres / 80 ft.) **1530018800**

Basic design with black cross landing area and white side walls. The neon-yellow side walls enhance the visibility of the safety cushion at night and in bad weather.

All safety cushion sets include repair material for base and side walls and are delivered in a sturdy packing cover.

Safety cushions SP 16 / SP 25	Ext. dimensions (LxWxH) cm / inch	Air requirement at 0.3 bar (4.35 psi) / 0.5 bar (7.25 psi) litres / cu. ft.	Inflating time, approx. sec.	Recovery time sec.	Folded size (LxWxH) cm / inch	Weight incl. compressed air cylinder kg / lbs

Safety cushion SP 16:
Working pressure: 0.3 bar (4.35 psi)
Test pressure: 0.45 bar (6.5 psi)

Safety cushion SP 25:
Working pressure: 0.5 bar (7.25 psi)
Test pressure: 0.65 bar (9.4 psi)

All safety cushions can be used in a temperature range from - 20 to + 50 °C (- 4 to + 122 °F).

Accessories – Safety cushions

Inflation hose, for direct connection to compressed air cylinder

on request

Test gauge, for checking the safety cushion

1530002101

Vacuum adapter for safety cushions and rescue paths

Attach quick action coupling to air source, the pressure should be between 4 and 6 bar (58 and 87 psi).

1600016300

Valve protection

Prevent accidental opening of gas cylinder valves caused by vibration or transport. Vetter has developed and patented a highly effective valve protection for compressed air cylinders 6 l / 300 bar (0.21 cu. ft. / 4,350 psi) with neck diameter 27 – 30 mm (1.1 – 1.2 inch) (other sizes on request).

1600027700

Compressed air cylinder

6 l / 300 bar, (0.21 cu. ft. / 4,350 psi) steel, 5/8" IT, 1,800 l (63.5 cu. ft.)

1600010800

9 l / 300 bar, (0.32 cu. ft. / 4,350 psi) composite, 5/8" IT, 2,700 l (95.3 cu. ft.)

1600019900

Safety cushion SP 60

The only lifesaver for jump heights up to 60 metres (192 ft.).

- › Large landing area
- › Psychologically optimised
- › Setup in 80 seconds
- › Rescue from up to 20 floors

Win against fires in buildings up to 20 floors high! Narrow city streets or inaccessible courtyards are no longer a problem with the SP 60. Rescue trapped persons quickly and easily, even at scenes your team can't reach with aerial ladder trucks.

Benefit from a number of features that make your job more efficient – and rescues safer: Two high-performance permanent blowers inflate the SP 60 within only 80 seconds. The clever two-chamber design and the innovative pressure compensation system ensure optimum impact deceleration. Practical: the quick action connection for blower attachment saves you valuable seconds. The design does without exposed seams on the underside of the safety cushion, preventing friction damage and avoiding unnecessary repairs.

Blower for permanent inflation*

Ramfan EV 420

	1530020700
Capacity	16,498 m ³ / h 9,705 cfm
Noise level	97 dB
Dimensions (LxWxH)	580x430x410 mm 22.6x16.8x16 inch
Weight, approx.	31 kg 68 lbs
Motor	1.1 kW, 240 V, 50/60 Hz

Leader ESP 230

	1530019100
Capacity	33,900 m ³ / h 19,956 cfm
Noise level	84 dB
Dimensions (LxWxH)	500 x 548 x 492 mm 19.7 x 21.4 x 19.2 inch
Weight, approx.	43 kg 95 lbs
Motor	2.2 kW, 230 V, 50 Hz

Technical data**

Safety cushion SP 60	Ext. dimensions (L x W x H) cm / inch	Inflating time, approx. sec.	Folded size (L x W x H) cm / inch	Weight, approx. kg / lbs
SP 60	850 x 650 x 250 331.5 x 253.5 x 97.5	80	155 x 100 x 55 60.5 x 39 x 21.5	240 529

The safety cushion SP 60 includes as standard components:

- › Safety cushion SP 60
- › 2 permanent blowers
- › Packing cover
- › Repair and spare parts set

The following SP 60 sets are available:

with Ramfan EV 420, electric blower	1530016000
with Leader ESP 230, electric blower	1530019400
with Leader MT 236 H, high-performance blower (petrol-driven)	1530019600

The psychologically optimised blue circle surface design has been shown to reduce the jumper's fear of heights.

- ### In operation ...
- › Fires in buildings with up to 20 floors
 - › Areas inaccessible to aerial ladder trucks such as courtyards and narrow inner-city streets
 - › Safeguarding for high-angle rescue

- ### Good reasons:
- › Tested based on DIN 14151 T 1 and T 3 (worldwide unique 60 metres safety cushion)
 - › Only 4 persons needed for setup and breakdown
 - › After a jump, the SP 60 recovers automatically in around 20 seconds
 - › Permanent blowers included

- ### Guaranteed quality:
- › Individually tested with falling weights
 - › Dated inspection seal
 - › 2-year guarantee

* Petrol-driven blowers are also available on request. Also 115 V, 60 Hz available on request.

** Technical changes reserved.

Rescue paths

Ensuring stability and safety in dangerous situations.

Rescue paths

Providing sure footing on all surfaces.

- › Ready for application in seconds
- › Flexibly expendable
- › Easy handling
- › Anti-slip surface

Always retain sure footing – even on unstable ground! With Vetter rescue paths, your team can walk safely across stretches of water, ice, moorland and bog. The rescue paths require very little compressed air and are ready to deploy in seconds. The three standard lengths of 6, 10 and 15 metres (19.2 ft., 32 ft. and 48 ft.) can be connected, so you will be prepared for any emergency scenario. The convenient anti-slip strips provide your team with a firm grip to safely rescue people who are drowning or sinking.

Safe walking on anti-slip strips

Sure footing on the water surface

Rescue path for emergency rescue at sea*

Technical data*

Rescue paths with anti-slip strips	Ext. dimensions (L x W x H) cm / inch	Air requirement at 0.5 bar (7.25 psi) litres / cu. ft.	Inflating time, approx. sec.	Folded size (L x W x H) cm / inch	Weight, approx. kg / lbs

Accessories

Inflation hose, 500 mm (20 inch), for direct inflation from compressed air cylinder

1530003401
1530007600 (USA)

Compressed air cylinder

6 l / 300 bar, (0.21 cu. ft. / 4,350 psi) steel, 5/8" IT, 1,800 l (63.5 cu. ft.)

1600010800

9 l / 300 bar, (0.32 cu. ft. / 4,350 psi) composite, 5/8" IT, 2,700 l (95.3 cu. ft.)

1600019900

Vacuum adapter for safety cushions and rescue paths

Attach quick action coupling to air source, the pressure should be between 4 and 6 bar (58 and 87 psi).

1600016300

In operation ...

- › Rescuing people who are drowning or who have fallen through ice
- › Rescue missions on unstable ground
- › Traversing stretches of water or boggy ground
- › Emergency sea rescue

Good reasons:

- › Inflated and ready to use in seconds
- › Several paths variably connectable
- › Optimum edge profile for pulling persons on board

Guaranteed quality:

- › Individually tested (with inspection seal)
- › Integrated safety valve prevents overinflation
- › Tear-proof material

Hazardous material program

Fast response to prevent environmental damage.

Leak sealing bags

Reliable sealing of large areas.

- › Up to 9 bar (130 psi) counterpressure
- › For containers with min. diameter of 50 cm (20 inch)
- › Sealing leaks in tanks
- › Sealing area up to 86 x 57 cm (34 x 22 inch)

Every minute counts when hazardous liquids escape from tanks, pipes or drums. Vetter leak sealing bags are quick and easy to inflate using a foot pump. Thanks to even pressure distribution, the structures around the liquid discharge area are protected and the danger that the leak gets bigger is reduced. All leak sealing bags come with a heavy-duty acid protection cover. Thanks to a pre-fabricated belt slots, the cover does not need to be removed during use or storage. The protective cover has an extra belt pocket, so you always have the right tools ready to hand.

Acid protection cover for safe use and storage.

Sealing reliably with the help of the convenient solution with belt slots

Vetter leak sealing bags come in two different versions:

Swivel eyes

Extra flexible in operation:

- › Can be braced up to 90°
- › Can be used in just about every position

Belt slots

The safe solution when there is a risk of explosion:

- › Belt slots have zero metal parts
- › No sparks can be generated

In operation ...

- › To cover large areas
- › To seal leaks in tank trucks and wagons
- › To seal large drums and pipes
- › To seal cracks

Good reasons:

- › Reinforced anti-expansion cover plate
- › Can be used in narrow gaps
- › Worked metal plates distribute the tension load over entire width of the bag

Guaranteed quality:

- › Individually tested (with inspection seal)
- › Heavy-duty, acid protection cover

Leak sealing bag sets

All sets described here include as standard components:

- › Foot pump with safety valve 1.5 bar (21.75 psi)
- › Inflation hose 1.5 bar, 10 m, blue (21.75 psi, 32 ft.)
- › Acid protection cover, PVC, yellow
- › 2 sealing plates 60x30x3 cm (24x12x1.2 inch)
- › 4 tension and extension belts with ratchet, 10 m (32 ft.), orange and blue
- › Transport case 80x60x22 cm (32x24x9 inch)

Sealing bag with swivel eyes

Sealing area of 50 x 30 cm (20 x 12 inch) **150000103**

The leak sealing bag type LD 50/30 W, 1.5 bar (21.75 psi), is available as a set with the above-listed accessories. This set also includes 2 ratchet belts (2 m/6.6 ft.), 2 attachment belts (5 m/16.4 ft.) and 2 tension and extension belts (10 m/32 ft.).

Leak sealing bag with swivel eyes

Leak sealing bag with belt slots

Sealing bag with belt slots

Sealing area of 50 x 30 cm (20 x 12 inch) **1500005302**

The leak sealing bag type LD 50/30 S, 1.5 bar (21.75 psi), is available as a set with the above-listed accessories.

Extend the life of your leak sealing bags by using the supplied sealing plates for sharp-edged leaks.

Special leak sealing bag sets

Technical data*

High-pressure leak sealing bag (10 bar / 145 psi)

For counterpressure of up to 9 bar (130.5 psi) 1500011102

The high pressure leak sealing bag resists tank internal pressures of up to 9 bar (130.5 psi), as found in chlorine tanks, for example.

Leak sealing bag type LD 50/30 S, 10 bar (145 psi), with belt slots

Single controller 10 bar (145 psi), fitting control

Inflation hose 10 bar, 10 m, blue (145 psi, 32 ft.)

2 tension and extension belts with ratchet, 10 m (32 ft.), orange and blue

Sealing plate 60x30x3 cm (24x12x1.2 inch)

Acid protection cover, PVC, yellow

Transport case 800x600x120 mm (32x24x4.7 inch)

XL leak sealing bag

Large sealing area of 86 x 57 cm (34 x 22 inch) 1500018301

The XL leak sealing bag for large leaks. Suitable for all containers with a diameter greater than 90 cm (35 inch).

Leak sealing bag type LD 110/60 S, XL, 1.5 bar (21.75 psi), with belt slots

Single controller 1.5 bar (21.75 psi), fitting control

Inflation hose 1.5 bar, 10 m, blue (21.75 psi, 32 ft.)

6 tension and extension belts with ratchet, 10 m (32 ft.), orange and blue

2 sealing plates 100x50x3 cm (40x20x1.2 inch)

Acid protection cover, PVC, yellow

Mini leak sealing bags

The small and quick leak-stoppers.

- › Quickly attached with Velcro belt
- › Delivered in practical case
- › Up to 1.4 bar (20.3 psi) counterpressure
- › For containers with diameters 10 – 90 cm (4 – 35 inch)

Vetter mini leak sealing bags are ideal for leaks in small containers with a diameter between 10 and 90 cm (4 and 35 inch). The mini leak sealing bags securely seal liquids and gases, are easy to attach and provide a quick solution in emergencies. The maximum working pressure of 1.5 bar (21.75 psi) is soon reached with just a few strokes of the foot pump – and the container is sealed. Quick and safe Velcro fasteners on the metal-free tension belts make light work of attaching the sealing bags – even in difficult positions.

Mini leak sealing bag with practical Velcro tension belts for quick and easy attachment.

Mini leak sealing bags set

1500009400

Mini leak sealing bags type LDK 10/10, 10/25, 20/20

Foot pump with safety valve 1.5 bar (21.75 psi)

2 tension belts, 150 cm (59 inch) and 3 tension belts, 300 cm (117 inch), blue

Transport case 600x400x183 mm (24x16x7 inch)

Technical data*

Mini leak sealing bags	Size (L x W x H) cm / inch	Sealing area cm / inch	Air requirement at 1.5 bar (21.75 psi) litres / cu. ft.	Weight of individual bag, approx. kg / lbs

Uniform sealing pressure of 14 m WC (20.3 psi).

Mini leak sealing bags: Working pressure: 1.5 bar (21.75 psi)
Test pressure: 1.95 bar (28.5 psi)

Weight of set, approx: 10.4 kg (23 lbs)

Sealing bags stop drum leaks.

In operation...

- › Small containers
- › Pipes
- › Rolling hoop drums
- › Containers with diameters 10 – 90 cm (4 – 35 inch)

Good reasons:

- › Flat design (1.2 cm / 0.5 inch)
- › Low air requirement
- › Can be inflated with a foot pump

Guaranteed quality:

- › Individually tested (with inspection seal)
- › Good resistance to chemicals

Leak sealing lance (1.5 bar / 21.75 psi)

The quick fix for sealing leaks.

- › Ready to use in seconds
- › For sealing cracks and holes
- › Only one person required for setup
- › Ensures safe distance from leak

When you're the first person on the rescue site, the Vetter leak sealing lance enables you to act quickly. With no assistance required, you can seal small leaks in storage tanks, tank trucks or wagons in seconds and from a safe distance. By using the wedge and cone bags at the tip of the leak sealing lance, you will effectively reduce the volume flow rate at cracks measuring 15 – 60 mm (0.6 – 2.3 inch) and holes measuring 30 – 90 mm (1.2 – 3.5 inch). Anti-slip profiles on the bags ensure a good grip. The device with its simple design provides an invaluable quick-fix which will buy you time to put further measures in place.

PVC hollow rods can easily be combined to give the lance a maximum length of 140 cm (55 inch).

Leak sealing lance set with foot pump	1500009600
	Wedge bag 6, 8, 11 and cone bag 7 (1.5 bar / 21.75 psi)
	3 PVC hollow rods (35 cm / 14 inch)
	PVC hollow rod with chain and nipple
	Shut-off unit
	Foot pump with safety valve 1.5 bar (21.75 psi)
	Drip shield
	Transport case 400x300x183 mm (16x12x7 inch)

Technical data*

Leak sealing lance (1.5 bar / 21.75 psi)	Size (L" x W x H) cm / inch	Air requirement at 1.5 bar (21.75 psi) litres / cu. ft.	Weight, approx. kg / lbs
Wedge bag 6 1500009800	23x6x5 9x2.4x2	1.5 0.05	0.2 0.4
Wedge bag 8 1500010000	23x8x5.5 9x8x2.2	3.5 0.12	0.3 0.7
Wedge bag 11 1500010100	23x11x7 9x4.3x2.8	7.8 0.28	0.4 0.9
Cone bag 7 1500010200	23xØ7 9xØ2.8	3.0 0.11	0.2 0.4

Leak sealing lance (1.5 bar / 21.75 psi):
Working pressure: 1.5 bar (21.75 psi)
Test pressure: 1.95 bar (28.5 psi)

Weight of set, approx.:
8.1 kg (17.9 lbs)

Seal leaks from a safe distance.

Ready-to-use system in practical transport case.

- In operation ...**
- › For cracks 15 – 60 mm (0.6 – 2.3 inch)
 - › For holes 30 – 90 mm (1.2 – 3.5 inch)

- Good reasons:**
- › One-person operation
 - › Inflatable with foot pump
 - › Adequate distance from danger area maintained thanks to 140 cm (55 inch) lance
 - › Shut-off unit prevents pressure drop and air leakage when decoupling

- Guaranteed quality:**
- › Individually tested (with inspection seal)
 - › Good resistance to chemicals
 - › Highly flexible rubber

Hazardous material program

Leak sealing bandages

Seal pipes in an instant.

- › Sealing area up to 38 cm (15 inch) wide
- › For pipes with diameters 5 – 48 cm (2 – 19 inch)
- › Belts fixed directly on bag
- › Up to 1.4 bar (20.3 psi) counterpressure

Sudden leaks in pipelines can be sealed in an instant with Vetter leak sealing bandages. Like this, you are always ready for action when an emergency arises. The leak sealing bandages can easily be handled completely on intuition even in first-time use: Wrap bandage around pipeline, tension the belt and inflate the bag. That's all there is to it!

Leak sealing bandage 5 – 20 XL
(38 cm / 15 inch wide)

Leak sealing bandage 5 – 20 and
20 – 48 (19 cm / 7.5 inch wide)

Technical data*

**Uniform sealing pressure
of 14 m WC (20.3 psi).**

The Vetter foot pump: Practical in use and quickly on-hand.

Recommended accessories

Foot pump 1.5 bar (21.75 psi), with safety valve

0150002800

**Inflation and safety hose 1.5 bar,
10 m, blue (21.75 psi, 32 ft.)**

0150002201

In operation ...

- › For sudden pipeline leaks
- › For leakages in pipes and round containers with diameters 5 – 48 cm (2 – 19 inch)

Good reasons:

- › Inflatable with foot pump
- › Easy handling
- › Fully reliable sealing
- › Bandage is delivered with belts

Guaranteed quality:

- › Individually tested (with inspection seal)
- › Good resistance to chemicals

High-pressure leak sealing system

Intelligent hose system for complicated pipe leaks.

- › Innovation from Vetter
- › Sealing in difficult-to-access places
- › For leaks in pipes with diameter up to 20 cm (8 inch)
- › For counterpressure up to 9 bar (130 psi)

In close collaboration with Henkel KGaA, Dusseldorf, Vetter has developed an intelligent sealing hose system. Now you can effortlessly access even hard-to-reach leaks in narrow or unevenly shaped piping systems. The flexible hoses fit perfectly even over complicated leaks, e.g. at T-pieces, pipe bends, connecting branches and welded seams. The hoses are inflated in seconds and withstand counterpressure of up to 9 bar (130.5 psi).

Precise sealing of difficult leaks.

Premium set

1500015800

1500019100 (USA)

With the premium set, you are equipped for every eventuality. It can be used with several different sized pipes and to seal several leaks at the same time. The set contains 3 sealing plates and can thus be used with a wide range of hazardous materials.

Sealing hose 1.5 m, 2.5 m, 3.5 m (59 inch, 98 inch, 138 inch)

Inflation valve and inflation hose

Pressure regulator 200 / 300 bar (2,900 / 4,350 psi)

3 sealing plates NBR, EPDM, FKM, 150x210x30 mm (6x8x0.1 inch)

Bleed valve

Transport case 600 x 400 x 183 mm (24 x 16 x 7 inch)

Intelligent sealing hose system.

Inflated in seconds.

In operation ...

- › Can be used on T-pieces, pipe bends or difficult-to-access connecting branches
- › For leaks in pressure lines or fittings

Good reasons:

- › Universally usable and easy to use
- › For counterpressure up to 9 bar (130.5 psi)
- › Additional sealing plates for extra stability
- › Sealing hoses with electrostatic conductivity (DIN ISO 8031/8.97)

Guaranteed quality:

- › Individually tested (with inspection seal)
- › Earth connection to sealing hose coupling on both sides
- › All metal parts made of stainless steel

High-pressure leak sealing system

Basic set

1500019000

The basic set contains 1 hose and 1 sealing plate. The pressure regulator is not included.

Sealing hose 2.5 m (98 inch)

Inflation valve and inflation hose

Sealing plate FKM 150x210x30 mm (6x8x0.1 inch)

Bleed valve

Transport case 400x300x183 mm (16x12x7 inch)

Technical data*

High-pressure leak sealing system	Air requirement at 10 bar (145 psi) litres / cu. ft.	Temperature °C / °F	Weight, approx. kg / lbs
1.5 m (59 inch) hose 1500015901	8.1 0.3	-30 bis +80 -22 up to +176	1.1 2.5
2.5 m (98 inch) hose 1500016001	14.6 0.5	-30 bis +80 -22 up to +176	1.4 3.0

Leak sealing paste

The easy way to seal valve connectors and flanges.

- › easy to apply
- › good resistance to chemicals
- › seals immediately
- › fast and easy

Vetter leak sealing paste:
Set of eight 500 ml tubs: 1500004600

Leaking chemicals pose a serious danger to people and the environment. Vetter leak sealing pastes are ideal when immediate action is needed to seal leaks. For the smallest valve connectors and flanges or for receptacles such as tanks, barrels and containers, Vetter leak sealing pastes seal leaks quickly and easily. You avoid further leakage and win valuable time for proper disposal or removal of hazardous materials by specialists.

In operation ...

- › also for hard-to-access leaks
- › for sealing pipes and containers
- › for leaking liquid chemicals

Good reasons:

- › immediate action to limit damage
- › easy to apply
- › seals quickly
- › can be used on rusty or dirty surfaces
- › can also be used in freezing temperatures

Guaranteed quality:

- › non-toxic
- › non-flammable
- › resistant to chemicals
- › long lasting

Vetter X-TREME leak sealing paste:
Set of eight 500 ml tubs: 1500026800

Pipe sealing sleeves

Durable leak seal for high-pressure pipes.

- › Up to 16 bar (232 psi) counterpressure › For pipes between 1/2" and 4"
- › Also suitable for long-term use › Supplied in compact transport case

Vetter pipe sealing sleeves reliably seal high-pressure lines with pressure up to 16 bar (232 psi) and can also withstand aggressive liquids. A simple and fully mechanical solution. The sealing sleeves contained in the set will equip you for the most common pipe sizes from DN 15 (15 mm/0.6 inch) to DN 100 (100 mm/3.9 inch). It couldn't be simpler: Gently bring the seal and sleeve close to the leak, place the sleeve over the leak and tighten with the Allen key.

Technical data*

Pipe sealing sleeves	Nominal size mm / inch	For diameter DN	Size (L x W x H) mm / inch	Weight, approx. kg / lbs

Pipe sealing sleeve set 1500002201

- The set includes:**
- › All 9 sleeve sizes (one of each size)
 - › Allen key
 - › Transport case 400 x 300 x 183 mm (16 x 12 x 7 inch)

In operation ...

- › Small cracks and holes in piping systems
- › Also suitable for aggressive liquids
- › For sealing pipe leaks

Good reasons:

- › Can even be used with smallest nominal pipe sizes
- › Suitable for long-term use
- › Withstands counterpressure of up to 16 bar (232 psi)
- › Set comes in handy transport case

Guaranteed quality:

- › Long-term heat resistance up to 80 °C (176 °F)
- › Internal EPDM sealing with very good resistance to chemicals
- › Galvanised surfaces

Leak drainage bags (1.5 bar / 21.75 psi)

Simple sealing and drainage of hazardous substances.

- › Sealing and drainage
- › For containers with min. diameter of 50 cm (20 inch)
- › Sealing area of 50x30 cm (20x12 inch)
- › Up to 1 bar (14.5 psi) counterpressure

Reliably seal leaks and safely drain hazardous substances with the acid drain hose. Vetter leak drainage bags are the ideal solution when substances cannot be drained via the normal opening, or if this can only be done with considerable technical effort, e.g. in the case of high-up discharge openings on tanks or a pump failure. As Vetter leak drainage bags are tensioned with belts, they can be used on many kinds of surfaces. The bags are quick and easy to inflate using a foot pump. Only a few strokes of the pump are required to seal the leak.

Drainage space 40 x 20 x 3.5 cm (16 x 9 x 1.4 inch)

Leak drainage bag set

1500005902

- Leak drainage bag type DLD 50/30 1.5 bar (21.75 psi)
- Foot pump with safety valve 1.5 bar (21.75 psi)
- Inflation hose 1.5 bar, 10 m, blue (21.75 psi, 32 ft.)
- 4 tension and extension belts with ratchet, 10 m (32 ft.), orange and blue
- Shut-off unit size D, stainless steel
- Acid drain hose, 5 m (16.4 ft.), with D suction coupling V4A
- Transport case 800 x 600 x 220 mm (32 x 24 x 9 inch)

Leak drainage bag	Size (L x W x H) cm / inch	Sealing area cm / inch	Sealing pressure m WC / psi	Air requirement litres / cu. ft.	Weight of individual bag, approx. kg / lbs	Weight of set, approx. kg / lbs
DLD 50 / 30 1500006001	62 x 30 x 6 24 x 12 x 2.4	50 x 30 20 x 12	10 14.5	2.8 0.1	8.2 18.1	31.9 70.3

Leak drainage bags:
Working pressure: 1.5 bar (21.75 psi)
Test pressure: 1.95 bar (28.5 psi)

The drainage bag has a drainage space of 40 x 20 x 3.5 cm (16 x 8 x 1.4 inch).

Precisely adjusts to the surface.

Reliably seal leaks and drain off hazardous substances at the same time.

In operation ...

- › For sealing and draining hazardous substances
- › In tank trucks and wagons
- › In large drums and pipes

Good reasons:

- › Acid drain hose with shut-off unit for controlled drainage
- › Gentle pressure distribution over the entire width of the bag
- › Quickly inflatable with foot pump

Guaranteed quality:

- › Individually tested (with inspection seal)
- › Stainless steel connections

Vacuum leak drainage bag

Autonomous and ultra-speedy drainage of hazardous substances.

- › Attaches itself quickly to surface
- › Drainage space with 20 cm (8 inch) diameter
- › No attachment belts required
- › For large containers and storage tanks

Let the power of the vacuum work for you. Vetter vacuum leak drainage bags seal leaks on clean, smooth and slightly curved surfaces in seconds. Without the need for tension belts! Avoiding time-consuming preparatory measures, they allow you to take immediate action in an emergency. The intelligent bag attaches itself to the liquid or gas leak area by creating negative pressure and utterly seals the leak. The round Vetter vacuum leak drainage bags are designed for optimum flow and they drain dangerous liquids safely and quickly.

Flow-optimised drainage space.

Vacuum leak drainage bag set

1500019700

Vacuum leak drainage bag type DLD 50 VAC

Acid drain hose, 5 m (16.4 ft.), with D suction coupling V4A

Shut-off unit size D, stainless steel

Transport case 800 x 600 x 120 mm (32 x 24 x 4.7 inch)

Technical data*

Vacuum leak drainage bag	Size Ø cm / Ø inch	Drainage space Ø cm / Ø inch	Vacuum bar / psi	Air requirement litres / min. / cu. ft. / min.	Weight of individual bag, approx. kg / lbs	Weight of set, approx. kg / lbs
DLD 50 VAC 1500007501	50 19.7	20 7.9	0.45 6.5	200 7	5.2 11.5	15.5 34.2

Vacuum leak drainage bags:
Working pressure of vacuum generator: 6 bar (87 psi)

*Technical changes reserved.

Slightly uneven surfaces become manageable.

In operation ...

- › Sealing and controlled drainage of hazardous substances
- › On smooth surfaces
- › On large containers and storage tanks

Good reasons:

- › No attachment belts required
- › Vacuum generator with manometer on bag
- › Round design for optimal flow results
- › Acid drain hose with shut-off unit

Guaranteed quality:

- › Individually tested (with inspection seal)
- › Stainless steel connections

Flange drain bag

Perfect fit for safe drainage at flanges.

- › Completely covers the flange
- › For DN 50 (50 mm / 1.9 inch) to DN 100 (100 mm / 3.9 inch) pipes
- › For lots of pipe connections
- › Sealing pressure of 1 bar (14.5 psi)

Problems with leaky pipe connections? Make the task of sealing difficult leaks on all types of flanges easier for your team. Flanges are critical pipe sections and conventional sealing bags will rarely be effective here. Vetter flange drain bags cover the flange and pipe, reliably stop the leakage of hazardous liquids and at the same time allow you to drain off the liquid in a controlled and safe manner. The bags come in three sizes to cover all customary pipelines and flanges. Gel plates are included for convenient smoothing out of minor irregularities and unevenness on the pipe's surface. It couldn't be simpler: Place the bag around the flange and pipe, close the zip fastener along the entire length of the bag and inflate the sleeves. Immediately, everything is sealed and you can commence with controlled drainage of the liquid.

Leak on pipe flange

Technical data*

Flange drain bags	External size Ø cm / Ø inch	Length cm / inch	Air requirement at 1.5 bar (21.75 psi) litres / cu. ft.	Weight of individual bag, approx. kg / lbs	Weight of set, approx. kg / lbs

Flange drain bag set

In operation ...

- › Sealing and controlled drainage of hazardous substances
- › On flanges and pipe connections

Good reasons:

- › Gas- and liquid-tight zip fastener
- › Acid drain hose with shut-off unit
- › Gel plates supplied to smooth out unevenness included

Guaranteed quality:

- › Individually tested (with inspection seal)
- › Stainless steel connections

Pipe sealing bags and bypass bags FS

Safely seal or divert pipes.

- › Very high resistance to heat
- › Good resistance to chemicals
- › For pipes with diameter up to 140 cm (55 inch)
- › Withstands counterpressure up to 5 m WC (7.25 psi)

Protect sewage systems and ground water from serious contamination. Vetter pipe sealing bags FS help your team stop hazardous substances quickly. With Vetter bypass bags, you can dam up hazardous liquids and gases and divert them controlled using a fire hose. Vetter's pipe sealing bags and bypass bags FS were specifically designed and developed for fire services. The bags individually adjust to different line diameters and are especially resistant to chemicals as well as heat.

Pipe sealing bags FS

Bypass bags FS

In operation ...

- › Holding back and diverting liquids/fumes
- › Sealing the openings of tank trucks and wagons
- › Creating a pump sump
- › In pipelines

Good reasons:

- › Various sizes available to seal pipe diameters 7 – 140 cm (2.7 – 55 inch)
- › Short-term resistance to temperatures up to 115 °C (239 °F) and long-term resistance to temperatures up to 90 °C (194 °F)

Guaranteed quality:

- › Individually tested (with dated inspection seal)
- › High-quality rubber with high resistance to chemicals

*Technical changes reserved.

Universal gully sealing bags

Protects sewage system and ground water from hazardous materials.

- › Good resistance to oil and chemicals
- › Withstands counterpressure of up to 10 m WC (14.5 psi)
- › Delivered in practical transport case
- › For gullies with diameters up to 30 cm (12 inch)

Stop the flow of hazardous liquids along roads, into sewage systems or into ground water. Vetter universal gully sealing bags are ready for use in an instant, easy to put into position and utterly reliable. Position the universal gully sealing bag with a guiding rod directly at the outlet of the gully and then use the sewer inlet as a pump sump. The gully sealing bag can be inflated with the foot pump. It is available in a basic set for one gully size or in a premium set for two gully sizes.

Universal gully sealing bag

Technical data*

Universal gully sealing bags	Gully outlet min. – max. cm / inch	Cylinder length cm / inch	Total length cm / inch	Diameter cm / inch	Air requirement at 2.5 bar (36.25 psi) litres / cu. ft.	Weight, approx. kg / lbs

Universal gully sealing bags:

Working pressure: 2.5 bar (36.25 psi)
 Test pressure: 3.25 bar (47.1 psi)
 Test counterpressure: 10 m water column (14.5 psi)

Weight of set:

Basic set: approx. 13.5 kg (29.8 lbs)
 Premium set: approx. 16 kg (35.3 lbs)

Premium set

1470001400

2 universal gully sealing bags type 10 / 15, 2.5 bar (36.25 psi)
 2 universal gully sealing bags type 15 / 30, 2.5 bar (36.25 psi)

Positioning rod, interchangeable, aluminium
 (L = 1.5 m / 58.5 inch)

Foot pump with safety valve 2.5 bar (36.25 psi)

Transport case 800 x 600 x 220 mm (32 x 24 x 9 inch)

Basic set

1470000100

- › 4 universal gully sealing bags type 10 / 15, 2.5 bar (36.25 psi)
- › Positioning rod, interchangeable, aluminium (L = 1.5 m / 58.5 inch)
- › Foot pump with safety valve 2.5 bar (36.25 psi)
- › Transport case 600 x 400 x 183 mm (24 x 16 x 7 inch)

You need the premium set to seal gullies with a diameter up to 30 cm (12 inch).

In operation ...

- › Chemical leaks
- › Floodings
- › To seal gullies
- › To use a sewer inlet as a pump sump

Good reasons:

- › Easy to position with the guiding rod
- › Adequate distance maintained thanks to integrated inflation hose
- › Sewer can be closed again with grate during use
- › Tether for lowering and securing bag

Guaranteed quality:

- › Individually tested (with inspection seal)
- › Resistant to ozone
- › Good resistance to oil and chemicals

Compact gully sealing bags

Reliably seal sewage systems and gullies.

- › Good resistance to oil and chemicals
- › Withstands counterpressure of up to 2 m WC (2.9 psi)
- › Ready to use in transport case
- › For gullies with diameters up to 80 cm (32 inch)

With the Vetter compact gully sealing bag, you can take action immediately. Seal the gully together with the sewer inlet: ready to use on the spot, quick to put into position and easy to handle. The sealing bags withstand counterpressure of up to 2 m water column (2.9 psi) and can be inflated with the supplied compressed air cylinder. Seal gullies with a diameter of up to 80 cm (32 inch) the easy way.

Technical data*

Compact gully sealing bags	Gully outlet min. – max. cm / inch	Cylinder length cm / inch	Total length cm / inch	Diameter cm / inch	Air requirement at 0.5 bar (7.25 psi) litres / cu. ft.	Weight, approx. kg / lbs
30 – 50 146000101	30 – 50 12 – 20	41 16	46 18.1	29.5 11.6	128 4.5	3.7 8.2

Compact gully sealing bags:
 Working pressure: 0.5 bar (7.25 psi)
 Test pressure: 0.65 bar (9.4 psi)
 Test counterpressure: 2 m water column (2.9 psi)

Weight of set: approx. 11,7 kg (25.8 lbs)

Compact set

1460001001

1460002400 (USA)

Compact gully sealing bag type, 30/50, 0.5 bar (7.25 psi)

Inflation and safety fitting

Compressed air cylinder 1 l / 200 bar (0.04 cu. ft. / 2,900 psi) (not filled)

Transport case 600 x 400 x 183 mm (24 x 16 x 7 inch)

Compact gully sealing bag

The compressed air cylinder is supplied with the set.

In operation ...

- › Chemical leaks
- › Floodings
- › To seal gullies

Good reasons:

- › Supplied compressed air cylinder (refillable) inflates two bags
- › Inflation fitting can be uncoupled for repeat use
- › Tether for lowering and securing bag

Guaranteed quality:

- › Individually tested (with inspection seal)
- › Resistant to ozone
- › Good resistance to oil and chemicals

*Technical changes reserved.

Pneumatic collection containers

Collect and store large volumes of hazardous materials.

- › Stable design
- › Collects up to 5,000 l (177 cu. ft.)
- › Set up in seconds
- › High resistance to chemicals

The easy solution for temporary storage. Contaminated and hazardous liquids must be stopped in their tracks straight away. Vetter's pneumatic collection containers can be set up in seconds, buying you valuable time. They create secure reservoirs, which your team can simply pump out at a later stage. You have a choice of materials to suit any given scenario. Our standard containers are made of PVC (e.g. resistant to nitric acid, hydrochloric acid, caustic soda, etc.) or Alcryn (e.g. resistant to ASTM oil No. 1 – 3, gear oil, kerosene, petrol, etc.).

The collection container sets include as standard components:

- › Collection container with PVC inner container
- › Repair material
- › Pressure regulator 200 / 300 bar
- › Packing bag

Technical data*

Pneumatic collection containers	Internal size cm / inch	External size cm / inch	Air requirement at 0.5 bar (7.25 psi) litres / cu. ft.	Capacity litres / cu. ft.	Weight of set, approx. kg / lbs	Folded size (L x W x H) cm / inch

Pneumatic collection containers:
Working pressure: 0.5 bar (7.25 psi)
Test pressure: 0.65 bar (9.4 psi)

Uniform height of 95 cm (37 inch).

Collects up to 5,000 l (177 cu. ft.) of liquid.

For extra-strong resistance to oil, inner container also available in Alcryn on request.

In operation ...

- › Collection and temporary storage of environmentally harmful liquids

Good reasons:

- › Self-erecting support frame
- › Inner container with different resistance properties also separately available
- › Highly stable

Guaranteed quality:

- › Individually tested (with inspection seal)
- › High resistance
- › Integrated safety valve prevents overinflation of support frame

Pneumatic collection tubs

High capacity for decontaminating vehicles.

- › Set up in seconds
- › Decontaminates vehicles up to 20 m (65.6 ft.) length
- › High resistance
- › Collects up to 18,000 l (635.6 cu. ft.)

With pneumatic collection tubs from Vetter you can be sure you are using the latest technology and that you are fully prepared even for major emergencies, such as epidemics. In emergency scenarios, you will be able to decontaminate trucks and emergency vehicles, for example, in a safe and controlled way. Stop hazardous substances before they cause environmental damage and store them temporarily until further action can be taken. In the case of a leaking tanker, for instance, push the collection tub directly under the vehicle at the scene of the accident. Vetter's pneumatic collection tubs can be set up in seconds and buy you valuable time to put measures in place to seal leaks.

You have a choice of materials to suit any given scenario. Our standard tubs are made of Alcryn (e.g. resistant to ASTM oil No. 1 – 3, gear oil, kerosene, petrol, etc.) or PVC (e.g. resistant to nitric acid, hydrochloric acid, caustic soda, etc.)

Technical data*

Pneumatic collection tubs made of PVC	Internal size m / inch	External size m / inch	Height cm / inch	Air requirement, at 0.3 bar (4.35 psi) litres / cu. ft.	Capacity litres / cu. ft.	Weight of set, approx. kg / lbs	Folded size (L x W x H) cm / inch

Truck tub 20 m (64 ft.) 1513003101 1513003401 (USA)	20 x 3 787 x 118	20.6 x 3.6 811 x 142	30 12	4,810 170	18,000 636	170 375	110 x 85 x 85 43 x 33 x 33

Pneumatic collection tubs:
Working pressure: 0.3 bar (4.35 psi)
Test pressure: 0.39 bar (5.7 psi)

The square collection tub is supplied in a robust packing tarp and the truck tubs are delivered with a 200 / 300 bar (2,900 x 4,350 psi) pressure regulator. Repair material is included with both versions.

Decontamination of entire vehicles.

In operation ...

- › Decontamination of cars and trucks
- › During contagions and epidemics, e.g. avian flu
- › Collection of environmentally harmful liquids
- › Additional protection for leak sealing

Good reasons:

- › Available in lengths up to 20 m (64 ft.)
- › Capacity of up to 18,000 l (635.6 cu. ft.)
- › Self-erecting support frame
- › Also available in special lengths

Guaranteed quality:

- › Individually tested (with inspection seal)
- › High resistance to chemicals
- › Integrated safety valve prevents overinflation of support frame

Water tanks

Space-saving storage of fresh and contaminated water.

- › Small folded size
- › Capacity of 500 – 10,000 l (17.6 – 353 cu. ft.)
- › Extremely sturdy material
- › Food-safe version available

Need to store large volumes of water, contaminated extinguishing water or valuable drinking water? That's no problem with Vetter's self-erecting flexible water tanks. Collect and store contaminated water after accidents, storms or fires. Vetter water tanks can hold up to one hundred times their folded volume.

Open water tanks (OWT): The open water tank is self-erecting thanks to the float ring. The tanks, which are made of tear-proof PVC, have a very sturdy anodised 2" aluminium flange and a shock-resistant PVC ball valve. The tank can be filled and emptied with speed and ease using a Storz A coupling. Vetter supplies the water tanks with repair kit as standard in a practical packing bag. As an option, we can also include covers for every tank size.

Closed water tanks (GWT): Reinforced PVC gives the closed water tanks maximum stability. You can also opt to have corner brackets fitted to the tanks for safe transportation by truck – even of filled tanks. An opening on the top side of the tank serves as a vent or for refilling.

Corner bracket set

1510009700

If you want to be able to transport filled tanks safely on a truck bed, specify the article number of the corner bracket set when submitting your order. We will then supply you with a tank with fixed brackets.

Vetter OWT in Action

Hazardous material tanks

Store and transport hazardous liquids safely.

- › Integrated pressure-relief valve
- › High resistance to chemicals
- › Ready to use in seconds
- › Capacity of 1,000 – 10,000 l (35.3 – 353 cu. ft.)

Protect people, the environment and ground water from hazardous materials. With Vetter hazardous material tanks, you can react to emergencies in an instant: collect the liquids on the spot and safely store them until further action can be taken. Carrying handles on each side and their light-weight, tear-proof nylon material make the tanks stable and easy to position. For your safety, every tank is fitted with a pressure-relief valve as standard for the safe storage of gas-forming liquids. The tanks can also be ordered with specially fitted corner brackets for transport on a truck bed.

Hazardous material tanks with a capacity up to 10,000 (353 cu. ft.).

Technical data*

Hazardous material tanks	Size (L x W) empty m / ft.	Total height (filled) m / ft.	Weight, approx. (empty) kg / lbs	Folded size cm / inch
GGT 1,000 litres 1510015200	2.1 x 1.5 6.7 x 4.9	0.35 1.1	13 28.7	70 x 45 x 45 27.6 x 17.7 x 17.7

**Resistant to temperatures between
– 40 °C and + 70 °C (– 40 °F and + 158 °F).**

Automatic pressure-relief valve for safe storage of gas-forming liquids.

Vetter hazardous material tanks are extremely resistant to chemicals, see resistance chart page 139.

In operation ...

- › Collection and storage of chemicals
- › Collection of hazardous materials like oil, petrol, diesel, kerosene, etc.
- › Temporary storage of large volumes of liquids

Good reasons:

- › Ready to deploy in seconds
- › No accessories required
- › Automatic bleed valve (0.034 bar / 0.5 psi) on top surface
- › Very stable and tear-proof

Guaranteed quality:

- › Resistant to temperatures between – 40 °C and + 70 °C (– 40 °F and + 158 °F)
- › TPU-coated, high-strength nylon material
- › High-frequency welded seams with additional sealing tape

GFRP collection containers

Safe storage of highly aggressive liquids.

- › 9 different sizes
- › Sealing safety lid
- › GFRP materials used for extreme resistance to acids
- › Capacity of 170 – 2,540 l (6 – 90 cu. ft.)

Caution when dealing with corrosive acids and hazardous alkaline solutions! Hazardous liquids pose a particular challenge for your emergency response teams. When simply sealing a leak is not possible, use Vetter's GFRP collection containers to collect corrosive substances. The containers are made of extremely acid-resistant, glass-fibre-reinforced polyester. As the containers come with secure lids with all-round sealing, you can also transport the liquids or keep them in long-term storage.

Technical data*

	Sealing-off cap	1600012600
	Adapter for construction-site compressor	1600012000
	Adapter for stationary compressed air network	1600008200
	Bag 18 x 45 cm (7 x 17.7 inch)	1520002500
Inflation with Vetter hand and foot pump, no further adapters or hoses needed.		
	Hand pump, 520 cc / stroke	1600008700
	Foot pump, 420 cc / stroke	16000009400

* For every air source other than the compressed air cylinder, you need one of the two green air-supply hoses.

** Note: If the outlet pressure of the compressed air network exceeds the allowed inflation pressure of the controller, then the adapter must be replaced with the pre-pressure regulator.

Pneumatic tents and showers

Immediately ready to use and extensively equipped.

Universal tents

Your pneumatic tent for all kinds of operations.

- › Immediately ready to use
- › Extensive standard features
- › Useable area 12 m² to 40 m² (130 to 430 sq. ft.)
- › 20 m² (216 sq. ft.) set up in just 1 minute

Vetter universal tents were developed especially for fire brigades. The tents are designed to need especially little time and personnel for transport, setup and takedown. Benefit from these features of our tents: self-erecting support frame, low weight, small folded size and ease of use. With our pneumatic tents, you can quickly set up protective space for colleagues or injured persons. Use the velcro fasteners to connect tents quickly and easily to other tents or directly with containers. Vetter universal tents are suited to a wide variety of uses such as living quarters for large-scale operations, triage facilities, or decontamination measures. For the latter, you can add Vetter shower units to all our tents.

Your pneumatic tent for quick operations:

- › Only 2 people needed for setup, ready for use in less than three minutes
- › Flexible, mobile and easy to use
- › Long time of use independent of electricity
- › One-piece system in a single package – no loose parts

For optimum performance in the field, Vetter tents are equipped with extensive features – even in the basic version.

Flexible in use and also when cleaning:
Cover and floor separately detachable.

Lighting and ventilation:
enough windows, even in the basic version.

Entry awning can be partly or
completely detached or rolled up.

Custom lettering optional.

In operation ...

- › Operation centre
- › Weatherproof changing tent
- › Crew or mess tent for large-scale operations
- › Triage facility

Good reasons:

- › Multifunction inflation connection for use with compressed air cylinder or blower
- › Remains operational for several days without additional air
- › Patented securing net in roof area optionally available

Guaranteed quality:

- › Individually tested (with inspection seal)
- › Integrated safety valve prevents overinflation
- › High-quality, durable support frame
- › Mould- and flame-resistant PU-cover material (DIN 4102 B1)

Universal tents:	Working pressure: 0.5 bar (7.25 psi) Test pressure: 0.65 bar (9.4 psi)	

All universal tents include as standard components:

- › Inflatable tent frame with tensioning ropes
- › Detachable tent cover with separate entry awnings (partly or completely rollable)
- › Detachable tent floor
- › Attachment loops in tent interior, e.g. for lamps
- › 1 door at each front side
- › Sufficient number of windows

The PZ 30 and PZ 40 universal tents are equipped with two air chambers for faster inflation. Each tent includes an accessory bag with hammer, pegs and repair material. All of the equipment is delivered in a handy package with carrying handles.

The Vetter standard colours

You want another colour? No problem, just call us on: +49 (0)2252 / 3008-0

You need a special size? We will be happy to produce any size for you.

Decontamination tent PZ 17 2 L

Decontamination of civilians or insertion teams.

- › Operational in only 5 minutes
- › Gender-specific room division
- › For up to 4 persons simultaneously
- › Combination of shower and dressing room

Decontaminate civilians as well as insertion personnel with the PZ 17 2 L. Due to its lengthwise partition, the tent is divided into 2 decontamination lines. These two lines provide sufficient space for separate showering of men and women. The shower units divide the tent into undressing, shower and dressing area. As each shower unit possesses a separate water supply, water amounts or temperature can be controlled individually. The colour coding of the passages in the tarpaulin (blue: water, red: heating or power, green: compressed air) provide practical orientation during deployment. The continuous catchment basin in the shower area prevents the transgression of liquid into the rest of the tent. If required, simply connect the Universal Tent PZ 17 as an additional supply or accommodation tent to the PZ 17 2 L and thus extend the function scope.

Simultaneous decontamination on 2 lines.

Decon Tent PZ 17 2 L comes standard with these components:

- › Inflatable tent frame including the guy cable
- › Removable tarpaulin with removable entrance tarpaulins
- › 4 doors (2 in each entrance tarpaulin)
- › 4 windows (2 in each entrance tarpaulin)
- › Removable tent floor
- › Removable longitudinal partition for subdividing the tent into the 2 lines
- › 2 shower units and shower hoses
- › Shower basin made of polyester fabric, PVC coated on both side (other qualities on request)
- › 4 shower handsets (2 handsets per shower unit)

Each tent comes with an accessories case including a hammer, earth pins and repair material. The whole equipment is supplied in a practical pack unit.

** The associated technical data can be found on page 118.

Decontamination tent PZ 40 3 L

Safe and quick mass decontamination.

- › Ready to use in only 5 minutes
- › Optimised room layout
- › For up to 12 persons at a time
- › Also for injured persons in horizontal position

Every minute counts in an emergency. Decontaminate large numbers of people in a short time. With two longitudinal separation walls, the tent can be divided into 3 decontamination lines. Use the middle line (1.85 m / 5.93 ft. wide) for decontamination of injured persons in horizontal position, the two outer lines (1.62 m / 5.18 ft. wide) offer enough space for separate showering of men and women. The shower units divide the tent into areas for undressing, showering and dressing. Since every shower unit has its own water supply, the quantity and temperature of water can be controlled individually. The colour coding of the duct openings in the tent provides practical orientation (blue: water, red: heating or electricity, green: compressed air). A one-piece collection tub in the shower area prevents liquids from pouring into the tent. To extend the functionality of the PZ 40 3 L, you can easily connect PZ 30 and PZ 40 universal tents and use them as additional supply or accommodation units.

Simultaneous decontamination on 3 lines.

The PZ 40 3 L decontamination tent includes as standard components:

- › Inflatable tent frame with tensioning ropes
- › Detachable cover with detachable entry awnings
- › 6 doors (3 in each entry awning)
- › 6 windows (3 in each entry awning)
- › Detachable floor
- › 2 detachable longitudinal separation walls for dividing the tent into the 3 lines
- › 3 shower units with removable shower curtains and shower hoses
- › Shower basin of polyester fabric with PVC coating on both sides (other qualities on request)
- › 12 hand showers (4 per shower unit)

Each tent includes an accessory bag with hammer, pegs and repair material. All of the equipment is delivered in a handy package. An expandable roller conveyer with spineboards is optionally available.

- › Self-erecting
- › Easy to integrate in a decontamination line

Vetter decontamination showers are specially tailored to your mission. Light and mobile, they fit on every emergency vehicle. The fronting basin prevents the spread of contaminated liquids. Clever magnetic fasteners for quick opening and closing of the shower curtain save valuable time in emergencies. With the integrated gloves, you can safely clean contaminated persons from outside. The raised support frame of our decontamination showers allows ergonomic posture while working. Eight movable shower nozzles at various heights guarantee complete cleaning. After cleaning, contaminated liquids can be drained from the inlaid basin without using a submersible pump. With their robust overall construction and special abrasion-resistant undersides, Vetter decontamination showers are especially durable. Extended by an universal tent, the shower can also feature areas for dressing and undressing.

Raised support frame for ergonomic working

Dual Decon shower, perfect for decontaminating casualties in the horizontal position

Integrated hand-held shower allows complete cleaning

In operation ...

- › Epidemics
- › Decontamination of patients in front of hospitals
- › Decontamination lines
- › Terror attacks or events of war
- › Personnel or patient shower in mobile hospitals

Good reasons:

- › Ready for use quickly
- › Can be combined with Vetter universal tents
- › Detachable components for easy cleaning
- › Includes everything professionals need

Guaranteed quality:

- › Individually tested (with inspection seal)
- › Integrated safety valve prevents overinflation
- › Support frame of sturdy material

Technical data for decontamination showers

The decon showers include as standard components:

- › Inflatable support frame with tensioning ropes
- › Detachable shower hose and curtain
- › Replaceable inlaid basin of polyester fabric with PVC coating on both sides (other qualities on request)
- › 8 movable nozzles at various heights
- › Fixture for attachment of an additional hand shower

Each shower includes an accessory bag with pegs and repair material.

All of the equipment is delivered in a handy packing bag with carrying handles.

Anti-slip predestal prevents contact with contaminated water

Integrated gloves for safe external cleaning

Recommended accessories

Coloured tarpaulins for decontamination lines,
PVC, 2,5 x 4 m (97.5 x 156 inch)

Tent customising

We meet your requirements, quickly and individually.

Complete freedom of design for individual tents – you can only get that at Vetter. If you are looking for a tent that provides the best possible support for your mission and a standard tent won't do the job, look no further than Vetter. We can produce a tent to match your wish configuration.

Your tent tailor

At Vetter, much is done by hand. That is why we can guarantee the utmost care and best quality, even for single series. Benefit from our decades of experience as experts for emergency pneumatics to realise the tent concept that is perfect for you.

Together, we will find the right solution for every mission.
 Ask us! +49 (0)2252 / 3008-0 or vetter.info@idexcorp.com or www.vetter.de.

Your options for individualization are infinite:

Fitting with insulation cover and/or inner tent

Transverse and longitudinal separation walls in any combination

Windows only with fly screens or with extra polyglass

Free choice of shape and number of windows and doors

Patented securing net

Floor removable (inside only) or completely detachable

Docking options for tents and containers

Extra duct openings for cables or heating

Ventilation hoods

Special colours and combinations to choose from

Special sizes on request

Custom lettering

The variations depicted here are only a selection of your options. Is the one you imagine missing? Just call us!

Inflation and deflation – Pneumatic tents

Inflation with cylinder

	Weight, approx.	10 kg 22.1 lbs

Water supply – Pneumatic tents

Water supply

Freshwater pump, with suction hose and strainer,

Suction connection: R 1" IT, Pressure connection: R 1" OT fitted with Storz D coupling

1520015800

	Flow rate	88 l/min.
	Voltage	230/50 V/Hz
	Speed	2,900 U/min.
	Protection class	44° F/IP
	Fuse rating	16 A/min.
	Suction lift max.	8 m 26.2 ft.
	Power consumption	1.3 kW
	Rated current	5.5 A
	Dimensions (LxWxH)	42 x 29 x 40 cm 16.5 x 11.5 x 15.5 inch
	Weight, approx.	13 kg 28.7 lbs

Waste water hose, 15 m, Storz D

1523029500

Mobile instant water heater „Dekon Mobil“ with integrated mixer

1520049800

	Throughput, approx.	40 l/min max.
	Operating pressure	15 bar max. (integrated pressure regulator to 6 bar)
	Water temperature	30°C - 60°C
	Internal burner thermostat	regulatable to max. 140°C
	Ignition control system	thermically controlled
	Net heating performance, approx.	90 kW
	Diesel consumption, approx.	7.8 l/h (calculated for permanent operation)
	Power connection / alternating current	230 V/50 Hz/0.3 kW
	Electrical control	24 V low voltage
	Dimensions	89 x 57 x 80 cm
Weight (net) approx.	65 kg (without full tank)	

Dosing device, with suction hose, connection: Storz D

1520016000

	Operating rate	10 l/h
	Working pressure	6 bar / 87 psi
	Operating temperature max.	40 °C / 104 °F
	Dosage amount	0.1 – 152 l/h
	Dosage	1 – 5 %
	Dimensions (LxWxH)	40 x 60 x 70 cm / 15.6 x 23.4 x 27.3 inch
	Weight, approx	8,9 kg / 19.6 lbs

* Protection against contact with tools, wires and similar objects with Ø > 1 mm (0.039 inch); protection against foreign bodies Ø > 1 mm (0.039 inch); splash-proof from all directions

Water supply – Pneumatic tents

Water distributor, 4-way, Storz D, e.g. for simultaneous operation of up to 4 showers

1520015600

Water supply hose, rubber, wound, dimensionally stable, suitable for hot water, length 2 m (6.6 ft.)

1520015500

Waste water management

Mini permanent aspirator MPA 2.0 MWF

2220003200

Exhaust nozzle for Decon-tub

1700014701

Waste water pump with flat suction, Storz D coupling

1520041600

Flow rate	170 l/min.
Motor	230 V AC
Protection class	Schuko IP 44
Pumping height	7 m (WC) 23 ft.
Power P1 / P2	430 / 210 W
Rated current	2.1 A
Dimensions	Ø 17.5 x 28 cm 6.8 x 10.9 inch
Weight, approx.	5.1 kg 11.2 lbs

Waste water hose, 15m Storz D

1700065500

Adapter piece C-D, as connector from the waste-water hose to the water tank

--

Open water tank (OWT)*,
(sizes 1,000 – 10,000 l / 35.3 – 353 cu. ft.) for collecting and temporarily storing leaking liquids, waste water storage

--

Closed water tank (CWT),
(sizes 500 – 50,000 l / 17.6 – 1,760 cu. ft.) for collecting and temporarily storing leaking liquids, waste water storage

--

Oil and water aspirators

For suctioning and pumping out liquids.

Mini permanent aspirator MPA 2.0 MWF

The compact solution for fire services.

- › For vacuuming up and pumping off fluids
- › Also suitable for dry suction mode
- › Very high chemical resistance
- › Modern design

The powerful Mini-Permanent-Aspirator 2.0 WMF was developed specifically for fire services and is perfect for vacuuming up and pumping off fluids. The compact, modern design facilitates space-saving transport in an emergency vehicle. The connection for a fire-service hose guarantees fast, simple pumping-off of fluids up to 11 m. As a dangerous goods specialist with many years of practical experience, Vetter knows exactly which demands are placed on a fire-service vacuum cleaner. That is why the MPA 2.0 MWF container is manufactured from rugged, fibreglass-reinforced plastics which excel with their excellent resistance to chemicals. The device has a separately selectable pump with an integrated, automatic switch-off mechanism at the maximum filling level. The practical, 6-metre suction hose facilitates a large coverage range and the ingenious MPA 2.0 MWF chassis promises ergonomic work along with good handling.

Dust-proof and water-proof

IP 68 grounding-contact plug

Perfectly protected

Integrated PRCD circuit breaker

Fire-service compliant

Connection for fire-service hose

Versatile

Sufficient chassis clearance

In operation ...

- › After floods and storms
- › After pipe bursts and fires
- › For fire services, technical relief organisations, etc.

Good reasons:

- › Very high chemical resistance of the GRP as compared with other container materials
- › Ergonomic carrying: Chassis-frame thrust bar is height-matched to the carrying handle on the engine head
- › Compact, modern design
- › Integrated switch-off mechanism
- › Chassis-frame design eases transport
- › Can be compactly accommodated in fire service or rescue vehicle
- › Easily removed engine head makes filter replacement and container cleaning easier

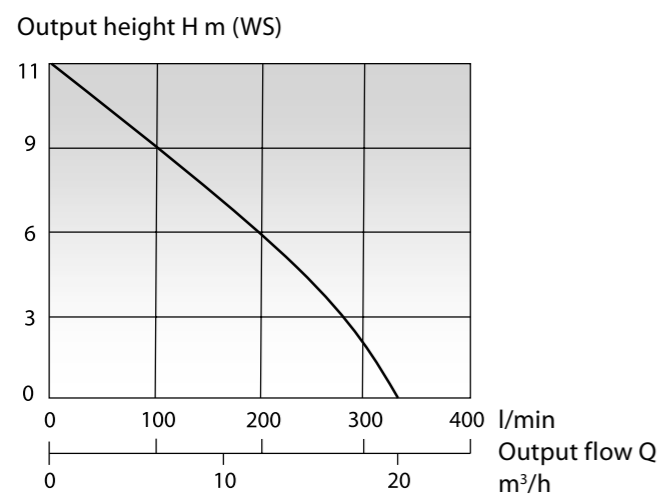

Guaranteed quality:

- › Verifiably tested (inspection seal)
- › Fire rating I
- › Protection class IPX4
- › Compliant with the latest EU directives and standards
- › Latest state of the art

Technical data*

MPA 2.0 MWF	2220003200
Mains voltage	230 V
Frequency	1~ 50 Hz
Max. performance	2350 W
Power (tot.)	2000 W
Rated power	1200 W
Capacity of the disposal pump	800 W
Container capacity	60 l
Filling quantity (liquid)	47 l
Air volume (max.)	56 l/s
Output pump (max.)	330 l/min
Negative pressure (max.)	23.5 (235) kPa (mbar)
Type of protection	IPX4
Protective class	I
Suction hose connection (C-DN/C-ID)	40 mm
Connector fire hose	Storz C
Length x width x height	520 x 430 x 840 mm
Typical operating weight (without accessory)	28 kg
Max. ambient temperature	+ 40 °C

*Technical changes reserved.

Permanent aspirator (PA)

2210001303

The specialist for vacuuming and pumping of liquids (up to 11 m):

- › For vacuuming and pumping of liquids
- › Pump can be switched on separately, allows controlled pumping
- › Capacity of 100 l (3.5 cu. ft.)
- › Trolley for round containers

Oil water debris aspirator (OWDA)

2200000804

The specialist for debris and granulated material:

- › For suctioning liquids, debris and granular solids
- › Capacity of 100 l (3.5 cu. ft.)
- › Lid also fits 200 l (7 cu. ft.) standard rolling hoop drums
- › Hazardous liquids can be suctioned directly into drums, securely sealed and transported

Rapid response to flooding or burst pipes.*

Note: Oil and water aspirators are not suitable for suctioning explosive and highly flammable liquids or dust and vapours posing a risk to health.

In operation ...

- › Floods and storms
- › Accidents, pipe bursts and fires
- › To suction foaming liquids
- › To suction binding agents, e.g. after traffic accidents

Good reasons:

- › Compared to other types of plastic, GFRP has very good resistance to chemicals
- › Sturdy design
- › Transparent container (makes liquid level visible)
- › Container can easily be replaced

Guaranteed quality:

- › Verifiably tested (inspection seal)
- › Aspirator-protection class IP 44 (splash-proof)
- › Tested according to VDE 0700-0701
- › Grounding-contact plug 2-pin IP 68 (water pressure-tight)

Airshore

For safe, long-lasting shoring and stabilisation.

Lite Pod

Special applications for special requirements.

The tripod system consists of struts and additional elements and allows one or more people to access confined spaces, for example in shafts, at great heights or in trenches. The system can also be used as the highest point for high angle rescue operations or for dam rescues. For maximum stability, the base plates are secured with a safety chain.

Lite Pod, lightweight

Allows access to confined spaces.*

7200011101

Special light-weight struts with a head attachment and base plates characterise the Lite Pod. As with the regular tripod system, stability is enhanced with a safety chain.

The set includes:

- > 3 Struts, adjustable for Lite Pod
- > 3 ARL 6" base plates, 150 mm (5.9 inch)
- > 1 Head attachment for Lite Pod
- > 1 Safety chain with quick action fastener
- > Total set weight, approx.: 32 kg (70.5 lbs)

Load capacity at:
0 – 45° = 4 t (4.4 US tons),
>45° = 1.5 t (1.6 US tons)

Optional accessories Lite Pod, lightweight

Set Winch

7200040001

Vehicle stabilisation

Fast protection for both rescuers and injured persons.

Airshore vehicle stabilisation enables you to securely support vehicles – after traffic accidents, for instance. The systems can also be used for large vehicles, such as tanks. They protect injured persons from further injury and ensure safe conditions for rescuers. Vehicles can be supported vertically, horizontally or diagonally and at angles of up to 45°. The systems feature a simple, light-weight, yet robust design and can be used even without the help of special tools.

ART-Lite set

7200000101

The ART-Lite set is a compact system for stabilising standard-sized vehicles. For fast, cost-effective stabilisation.

	1 ART-Lite strut, 410 – 584 mm (16 – 22.8 inch)	2
	2 ART-Lite strut, 711 – 1,040 mm (27.7 – 40.6 inch)	2
	3 Extension, adjustable from 300 – 450 mm (11.7 – 17.6 inch)	2
	4 Extension, adjustable from 450 – 762 mm (17.6 – 29.7 inch)	2
	5 ARL-WA wedge attachment	2
	6 ARL-DH diamond head attachment	2
	7 ARL-Pointv Rhino head attachment	2
	8 ART-RS ratchet strap	4
	9 ART-RSE ratchet strap extension	2
	10 Transport bag, large, blue, 84x34.3x20.3 cm (32.8x13.4x7.9 inch)	1
	11 Transport bag, small, blue, 57x34.3x20.3 cm (22.2x13.4x7.9 inch)	1

Total set weight, approx.: 31.8 kg (70.1 lbs)

Vehicle stabilisation with ART-Lite strut.

QuickStrut

The fast strut system.

Speed is often of the essence when a rescue is necessary after a traffic accident. No problem with the QuickStrut fast shoring system! With a load-bearing capacity of up to one ton per strut, it can be used for crashed vehicles of standard sizes. To avoid confusion or delay during use, all the parts are pre-assembled. All struts are form-fitting and can be set up from either end within one minute. Other comparable systems take much longer to set up. The QuickStrut system is easily positioned diagonally on the vehicle at an angle of 25° to 35°, attached to the body of the car, and tightened with the ratchet belt. That's all there is to it! QuickStrut is based on the construction strut system, is absolutely self-explanatory and can therefore be used by any fire fighter.

QuickStrut set

7200035100

2 QuickStruts, 122 – 200 cm (47.6 – 78 inch), 12.7 kg (28 lbs), load capacity 1,000 kg (2,205 lbs)

2 adjustment wrenches

Transport bag, 25.4 x 27.9 x 137.1 cm (9.9 x 10.9 x 53.5 inch)

Total set weight, approx.: 31.8 kg (70 lbs)

Accessories set QuickStrut

7200035200

2 cluster hooks

2 straps

2 protective sleeves

Accessories bag

Total set weight, approx.: 2.7 kg (6 lbs)

ART Attack

Provides access to a wide variety of spaces.

ART Attack was designed as a multifunctional tool for fire services, rescue organisations and the police, enabling fast access to people in need of help. The Black Edition is mainly used in tactical operations by special units. ART Attack is suitable for opening cars and locked rooms. It is also capable of puncturing metal, levering heavy loads, creating openings for fire-extinguishing purposes and breaking through a wide variety of materials.

Ready for any challenge

With the two ART Attack head attachments, you have the right tool for every application*.

Pry wedge

The pry wedge is used to lever loads or draw nails.

Flat wedge

The flat wedge is used to break down house doors or car doors.

Spike

The spike is used to prise open doors and puncture sheet metal or other materials.

ART ATTACK completely

7200034100		Straps	7200034400
Transport bag , 25.4 x 27.9 x 137.1 cm (9.9 x 10.9 x 53.5 inch)		Protective sleeves	7200034500
7200034200		Accessory bag	7200034600

Vetter resistance charts

Transparency for your safety.

Since your products have to withstand thermal as well as chemical requirements, Vetter gives you detailed resistance information.

The data is based on laboratory tests, experience and are influenced by such factors as temperature, intensity, length of exposure etc.

These symbols indicate degrees of resistance:

- +** resistant
- not-resistant
- o** conditionally resistant
- n. d.** no details

Temperature resistance limits

Products	Cold resistance	Cold flexible	Heat resistance, long term	Heat resistance, short term
Connectable Bags C.Tec 10 bar (145 psi)				
S.Tec 12 Lifting Bags 12 bar (174 psi)				
Ultra flat bags S.Tec 10 bar				
Mini lifting bags 8 bar (116 psi)				
Leak sealing bags				
Mini leak sealing bags				
Leak sealing lance	-40 °C	-20 °C	+90 °C	+115 °C

Pipe sealing bags and bypass bags FS				
Universal and compact gully sealing bags				
Wedge lifting bags and lifting bags 1 bar (14.5 psi)	-40 °C	-20 °C	+70 °C	+85 °C
Safety cushions (support frame)				
Rescue path 0.5 bar (7.25 psi)	-30 °C	--	+70 °C	--
Water tanks				
Collection containers and tubs				
Support frame rubber	-40 °C	--	+70 °C	--
Support frame PVC	-30 °C	--	+70 °C	--
Inner basin PVC	-25 °C	--	+100 °C	--
Inner basin Alcryn	-25 °C	--	+70 °C	--
Pneumatic tents and decontamination showers				
Support frame rubber	-40 °C	-20 °C	+70 °C	+85 °C
Support frame PVC	-30 °C	--	+70 °C	--
Tent floor PVC	-25 °C	--	+100 °C	--
Tent cover PVC	-40 °C	--	--	+50 °C
Tent cover PU				
High-pressure leak sealing system (Sealing hoses)	-30 °C	--	--	+80 °C
Pipe sealing sleeve (Seal)	-40 °C	--	+80 °C	--
Hazardous material tanks	-40 °C	--	+70 °C	--
Rubber hoses	-40 °C	-30 °C	+90 °C	--
Packing bags and covers				
Acid protection covers	-20 °C	--	+50 °C	--
Controller: plastic, aluminium and fitting				

Please notice:

An expanding material reacts to chemicals a lot quicker than when it is in the non-operative condition. This means, the greater the expansion, the lower the chemical resistance. Resistance also depends on material thickness, which is attributable to diffusion. Because of that, our resistance list can only give you points of reference.

We will gladly provide material samples to users wishing to conduct their own chemical resistance tests.

Material list

Products	Material	Support material
Lifting bags 1 bar (14.5 psi)	CR	Aramide / Polyester
Wedge lifting bags 1 bar (14.5 psi) (Bottom and top)		
Connectable Bags C.Tec 10 bar (145 psi)	CR	Aramide

A part of the IDEX Corporation.

Vetter GmbH is part of the international IDEX Corporation. This corporation invests in successful medium-sized companies in highly specialised markets. All members of the group have two things in common: strong technical orientation and innovative strength.

In addition to Vetter, the IDEX Rescue division includes some of the strongest brands from the field of fire and rescue services such as HURST – JAWS OF LIFE, the American rescue cutter manufacturer, and LUKAS Hydraulik, a long-established company from Germany.

As our customer, you will benefit twice: on the one hand from our international practical knowledge and on the other hand from the intensive transfer of skills and know-how within the corporate group. This know-how contributes directly to the development of sophisticated and high-performing products.

www.idexcorp.com

The all-round manufacturer for specialized emergency pneumatics

Owing to the intensive work for fire services throughout the world, Vetter was able to create an extensive product range which has become indispensable in many fields of rescue. Vetter stands for specialized technical knowledge. Based on this we develop optimally tailored pneumatic solution for different application scenarios.
